ABOUT US

A Door Factory Built Around Modern Living

SPSEN 尚品森 manufactures fashion paint-free wooden doors and matching-color aluminum-wood doors in Zhongshan, Guangdong, China. Our doors are made from carbon crystal board with realistic wood-grain textures — paint-free and with ultra-low formaldehyde emission (E0 grade).

Why Choose SPSEN

Paint-Free & Healthy	No painting, no VOCs; formaldehyde emission tested to E0 grade.
Realistic Wood Grain	Synchronous flat-press and moulding create deep, tactile textures.
Carbon Crystal Board	Moisture-resistant, scratch-resistant and dimensionally stable.
Custom Sizes	Standard 920×2150 mm; super-high doors up to 3050 mm.
24+ Finishes	Walnut, oak, teak, Manhattan and modern neutrals — with matching frames.
Factory Direct	OEM/ODM, flexible MOQ, export packaging and responsive service.

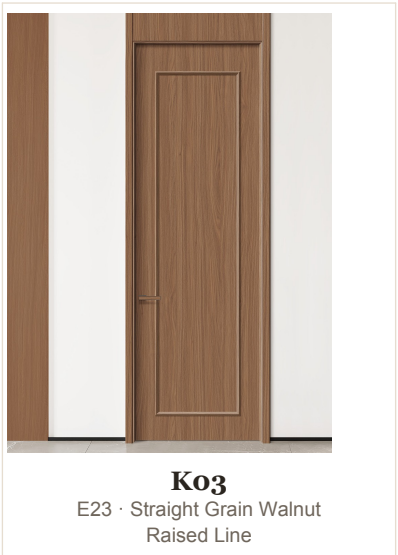

Matching-Color Aluminum-Wood Door System

Our integrated system pairs the door leaf with matching-color aluminum frames — inner-flat inner-opening A and B frames, aluminum casings, edge trims and honeycomb connection boards — so the whole doorway stays perfectly in tone, in every finish of our colour card.

Our Doors

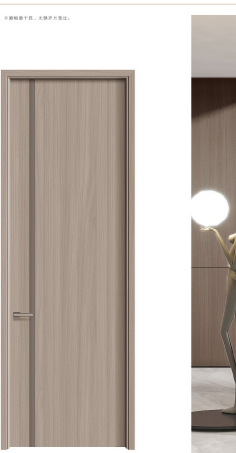

Fashion paint-free wooden doors in raised-line, fashion and flat-panel styles — every model available in 24+ matching finishes. Standard size 920×2150 mm; custom super-high sizes up to 3050 mm available.
